

The theme of our 48th annual World Trade Day conference is Digital Globalization, and how technology is helping to accelerate connections, transparency and trade. Learn from local and global experts, connect with your peers based on your topic of interest or specific industry, set up B2B meetings, and connect through chats and video calls.

Join us to discuss the impact of global trade on our region and the world, learn how to jump-start your business, mitigate risk, and leverage the latest technology to boost your global operations.
